

# imagePROGRAF TX-4000 MFP T36

## A GAME-CHANGING LARGE-FORMAT MULTIFUNCTION PRINTER; EFFICIENT PRODUCTION AND CLASS-LEADING QUALITY.

An advanced 44-inch large-format multifunction inkjet for high-end CAD, GIS and Poster production. Supreme productivity, outstanding quality, and intuitive operation across printing and scanning tasks.

- New 5-colour print head and continuous printing capability enable outstanding productivity
- Printing and scanning simultaneously drives further workflow efficiency
- Simple and convenient maintenance thanks to dual-roll feeding and easy roll replacement
- LUCIA TD ink delivers sharp text and fine lines, even on economical uncoated paper
- Superb scanning quality, using Colortrac SingleSensor technology to deliver consistent performance
- Intuitive control across print and scan tasks, via 15.6-inch colour touchscreen display and new SmartWorks software
- Scan board media up to 2-mm thick
- Compact design, with scanner closely integrated, helps the TX-4000 fit into small office spaces
- Peace of mind from excellent reliability and impressive security credentials
- Optimised for weather-resistant media printing, perfect for CAD, GIS and outdoor Posters

## NOTES & RECOMMENDATIONS

- Thick documents up to 2mm must be flexible and the paper return guide removed. Some media should be scanned at reduced speeds to obtain optimal image quality. Colortrac cannot guarantee to scan all media. For large media Colortrac recommend the scanner be placed on a flat surface and the operator supports the document as it enters and exits the scanner.
- The scan rate is proportional across the full range of resolutions supported by the scanner. Actual scan times and quoted top speeds will depend on the host performance and are not guaranteed for all media types. True 200 x 200dpi image capture. Competitors quote scan speeds using 'Turbo', 'Normal' or 'High Speed' modes that reduce image quality whilst suggesting that scan resolution is doubled. These modes use software interpolation to create 'virtual image pixels' from a lower resolution scan thereby increasing the number of pixels in the scan direction (&/or X-direction) in an attempt to simulate higher image resolution. Colortrac SmartLF scanners are designed to scan images fast at the optimum resolution required to capture the original image detail without compromising quality.
- Please check your local supplier, some LCD options may not be available in your country.
